Renata's

JAPANESE ADVENTURE

Renata went on a fun trip to visit Japan and learn about their culture. It is there she learns about all of the things that Japanese people do differently to the people who live in Australia.

With songs and stories, Renata educates children about Japan's culture. Japanese people eat different foods; they have different rules in their homes and even eat their food in a different way. They wear different clothes and even their buildings and homes look different.

With the help of the dress up box the children dress up to act out an old Japanese tale. With the help of songs and enlarged photos of everyday life in Japan, we come to learn that we are such an interesting world full of interesting people.
